## **Resource Book**

World Wide Web Version

**CONSERVATION LAW FOUNDATION**

by

Erno R. Bonebakker, Portland ME

with contributions by

Peter Shelley, CLF, Rockland ME

Kim Spectre, CLF, Rockland ME

## CREDITS AND ACKNOWLEDGEMENTS

This resource book was developed during the Casco Bay “Return the Tides” pilot project in the summer of 1999. In large part, it is an adaptation and development of the marsh assessment manual developed by Rob Bryan of Maine Audubon and Michele Dionne of Wells NERR<sup>1</sup> and the methods developed by the Parker River Clean Water Association in Newburyport, MA.<sup>2</sup> Particular credit is due to Rob Bryan of Maine Audubon Society and Dr. Michele Dionne of the Wells Reserve for their guidance in the preparation of this manual. Rob’s unfailing support and advice has been a particular help. David Mountain and Tim Purinton of the Parker River Clean Water Association in Newburyport, MA were also critical in compiling their field methods handbook describing a simple way to develop and record useful inventory information using volunteers..

In addition, this book is the product of the thoughts and vision of a number of people who have dedicated themselves to estuaries: the science of estuary systems, the education of the public about the wonders of these systems, and the protection and restoration of these special places. They were completely generous in allowing us to borrow shamelessly from their writings and thinking and this effort in Maine would not have been possible without their gracious support. To that end, we would like to thank the following individuals and commend our readers to their efforts directly. Contact information is in the appendix.

Alan Amman, Ph.D., NRCS, New Hampshire  
Beverly Bailey-Smith, Casco Bay Estuary Project  
Stephanie Cox, Maine Audubon Society  
Mark Des Meules, State Planning Office  
Katherine Groves, Casco Bay Estuary Project  
Elizabeth Hertz, State Planning Office  
Eric Hutchins, NMFS, Gloucester  
Steven Luttrell, Greater Portland Council of Governments  
Betty MacInnes, Cumberland County Soil and Water Conservation District  
Peter Milholland, Friends of Casco Bay  
Hilary Neckles, Ph.D., USGS, Augusta  
Joe Payne, Casco Baykeeper  
Ron Rozsa, CT DEP, Office of Long Island Sound Programs

Of course, this project would not have seen the light of day without our generous financial supporters. The Maine Outdoor Heritage fund, the Maine Community Foundation, and the Stephen and Tabitha King Foundation had the vision to recognize the importance of tidal marshes to Maine. We thank them.

For assistance in preparation of this resource book: Laura McDill provided timely and invaluable help in editing the text. Victoria Bonebakker not only patiently accepted the author’s distraction while compiling the book but also read the text and vastly improved it with her editorial suggestions. TransitID, of Portland, Maine, especially David Addison and Larry Burningham were incredibly generous with their time in preparing the book for posting on the World Wide Web. Any errors are ours alone, not any of those who helped us.

---

<sup>1</sup> Robert R. Bryan, Michelle(sic) Dionne, Ph.D., et al. , *Maine Citizens Guide to evaluating, Restoring and Managing Tidal Marshes*.

<sup>2</sup> Purinton, Timothy A. and David C. Mountain, Ph.D. *Tidal Crossing Handbook, A Volunteer Guide to Assessing Tidal Restrictions*.

Finally, nothing would have gotten done without the following volunteers who helped us collect information on tidal restrictions in Casco Bay. THANK YOU

Samantha Barrett, Portland; Jim Burke, Harpswell; Deborah Cowperthwaite, Harpswell; Stephanie Cox, Falmouth; Art Dodge Harpswell, Reen Gavin, Brunswick, George Hyde, Cumberland, John Mackinnon, Yarmouth, Lisa MacVane, Gorham, Meaghan Murphy, Portland, Peter Milholland, South Portland, Diane Nicholls, Portland, Ann Perry, Brunswick, John Porensky, Falmouth; Paul Porensky, Falmouth, Walter Phillips, Harpswell; Lin Maria Riotto, Bath; Laura Vitale, Freeport, Bob Waddle, Harpswell; Stella Walsh-Wainer, Yarmouth, Tracy Webber, Portland

Any others, whom we have inadvertently omitted, know who you are and have our thanks as well.

# Return the Tides Resource Handbook

<b><i>Table of Contents</i></b>	iii
<b>PREFACE</b>	P-1
<b>INTRODUCTION: WHERE THE LAND MEETS THE SEA</b>	I-1
Killing the Golden Cod	I-2
Returning Our Coasts	I-2
Offering a Solution	I-3
<b>SECTION 1: A PRIMER ON MAINE TIDAL WETLANDS</b>	1-1
<b>Definition of Tidal Wetlands as used in the <i>Return the Tides</i></b>	
<b><i>Resource Book</i></b>	1-1
<b>Tidal Marsh Formation</b>	1-2
<b>A Note About Tides</b>	1-3
<b>Important Tidal Marsh Habitats</b>	1-5
<b>Classification of Tidal Marsh Systems</b>	1-6
<b>Distribution of Tidal Marshes on the Maine Coast</b>	1-7
<b>Ecological Functions and Societal Values of Tidal Marshes</b>	1-9
Ecological Functions of Tidal Marsh	1-9
Societal Values of Tidal Marshes	1-11
<b>Threats to Tidal Marshes</b>	1-12
<b>SECTION 2: MASTERING THE LINGO -- RESTORATION TERMS AND TECHNIQUES</b>	2-1
<b>Restoration Terms</b>	2-2
<b>Tidal Marsh Disturbance and Post Disturbance Conditions</b>	2-4
<u>Human Marsh Disturbances</u>	2-4
<u>Natural disturbances</u>	2-7
<u>Post Disturbance Conditions</u>	2-7
<b>Restoration Strategies</b>	2-9
<b>Conclusion</b>	2-10

<b>SECTION 3: PHASE III -- MAKING RESTORATION HAPPEN</b>	
<b>A Restoration Project Is A Campaign</b>	3-1
<u>Develop a good business plan for your project</u>	3-1
<u>Identify and enroll strategic partners</u>	3-2
<u>Complete a site-specific restoration feasibility analysis</u>	3-6
<u>Build public awareness and enthusiasm</u>	3-7
<b>Permitting and regulatory requirements</b>	3-8
<u>The State Permit</u>	3-9
<u>The Federal Permit</u>	3-10
<b>Supervising the restoration project</b>	3-10
<b>Conducting post-project monitoring</b>	3-11
<b>The Good News/Bad News About Your Salt Marsh Campaign</b>	3-11
<b>SECTION 4: TIDAL WETLANDS ARE PART OF A LARGER LANDSCAPE</b>	4-1
<b>SECTION 5 OVERVIEW OF RETURN THE TIDES METHODOLOGY</b>	5-1
<b>Details of the Methodology</b>	5-2
<u>Preliminary Phase</u>	5-2
<u>Phase I</u>	5-2
<u>Phase II</u>	5-3
<u>Phase II Follow up</u>	5-4
<b>SECTION 6: CONCLUSION</b>	6-1
<b>List of Figures</b>	v
<b>List of Appendices</b>	vi

## List of Figures

Figure 1- Coastal marsh types (after Mitsch & Gosselink, 1993)	1-2
Figure 2- Tidal Marsh Development (after Dreyer & Niering, 1995)	1-2
Figure 3 - Growth of Wells Marshes (after Kelley et al., 1995)	1-3
Figure 4- Spring And Neap Tide Forces (adapted from, NOAA, 1999)	1-4
Figure 5- Spring and Neap Tide Curves	1-4
Figure 6- Tide Levels and Datums (adapted from <i>HO chart No. 1</i> )	1-4
Figure 7- Marsh Plant Communities and Zonation (after Tiner, 1987)	1-5
Figure 8- Marsh Geomorphology (after Bryan & Dionne, 1997)	1-6
Figure 9- Maine Coastal Marsh Distribution (after Bryan & Dionne, 1997)	1-9
Figure 10- Maine Marsh Bird List	1-10
